NOTES ON DATA

Data Collection -- ASPH began collecting data in aggregate form in 1988 in an effort to provide the most current information on applications and enrollments. The aggregate report is meant to serve as a supplement to the annual Data Report On Applicants, Students, Graduates and Expenditures which has been produced annually (during the summer months) since 1974.

Time Period -- Data for the aggregate report is collected for the fall semester. However, it is important to note that data for fall 1990 is an ESTIMATED FIGURE as applications and enrollments may continue to arrive throughout the semester depending on individual school deadlines.
